Rotaflow II

Proven strength. Reinvented.

- **The new and lightweight design** of the Rotaflow II System improves ergonomics and makes transport within the hospital easier.
- **The user interface with familiar elements**, supporting features and advanced alarm management, is easy-to-use and intuitive to operate.
- **The hot-plug capable Rotaflow II Drive** ensures immediate exchange during operation for gentle and continuous patient care.
- **Compact and intuitive holder concept** for safe and resource-saving intra-hospital transport as well as optimal integration into the workplace
- **Rotaflow II offers a more sustainable** and consumption based replacement of batteries by the customer. The concept enables the customer to calibrate or replace the systems batteries.
- **Rotaflow II offers different interfaces** to external devices

Rotaflow II

Proven strength. Reinvented.

The Rotaflow II System is a reliable, high quality extracorporeal life support (ECLS) system that gives you the flexibility you need to provide quality patient care.

It can be used for both veno-arterial (VA) and veno-venous (VV) ECLS / ECMO. VA-ECMO supports both, the heart and lung in the case of cardiac and or respiratory failure, while VV-ECMO offers therapy to patients who have severe pulmonary insufficiency and cannot be supported using conventional ventilation strategies.

Rotaflow II not only comes in a completely new housing and with an enhanced and simplified user interface, but also offers many valuable features and improvements.

And is still compatible with the proven PLS Set.
